Art Unit: 2652

1. It is requested that Applicant thoroughly revise the specification and claims to conform with idiomatic English. At present, the specification is awkward and confusing, and the claims are unclear. Phraseology such as "apparatus of a system supplying lubricant" and "components-in-apparatus" are unclear. Further claim 6 does not present the chemical formula properly. It would be very helpful if these problems were corrected before the first Office Action on the merits.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a magnetic disk drive, classified in class 360, subclass 97.01.
- II. Claim 7, drawn to a method of making a disk drive, classified in class 29, subclass 603.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the disk drive of Group I can be made using a materially different method – e.g. any of the known non-hand, "machine" coating techniques.

Art Unit: 2652

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Mattingly on 11/17/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
